

## About CP & AA >>>

Cegullah Publishing and Apologetics Academy is a Canadian, **online**, accredited academy. We provide Christian, non-denominational resources for reading, as well as Bible Study materials for both unaccredited and accredited courses for degrees.

## Our Approach to Learning >>>

CP & AA actively engages our students in all our resources and study materials. We do this by using inductive study methods, giving the student opportunity to connect with the Holy Spirit throughout the learning process.

Additionally, we present our subject matter in an easier format for learning. For example, when teaching on creation, we incorporate that subject within the course, Heaven's Greater Government. This course shows how God's government effects the whole earth, including its activity at creation.

Our courses on intercession and miracles fall within the books entitled, "Candidate for a Miracle, Arising Incense and Molded for the Miraculous. Within these courses, we show the need, effectiveness and power of intercession, as well as the influence of these on miracles.

We find approaching the scriptures in this manner, makes them come alive and studying them of greater interest.
